## Ethylene Oxide Sterilizer (ETO)

SR	CHAMBER DIMENSION	SIZE IN MM	STD SIZE & CAPACITY INLTR APR
1	12"(H)x12"(W)x24"(D)	300x300x600 mm	2Cft/55ltr
2	12"(H)x12"(W)x48"(D)	300x300x1200 mm	4Cft/110ltr
3	12"(H)x12"(W)x54"(D)	300x300x1350 mm	4.5Cft/125ltr
4	18"(H)x18"(W)x42"(D)	450x450x1050 mm	8Cft/220ltr

### Applications :

- Hospitals
- Food & Spices Industries
- Hospital Disposable Manufacturing Industries
- Tubing
- Sutures
- Custom Procedure Kits, Tubing Set, Adhesive
- Tracheotomy Tubes.

### ETO.

- Chamber and all contact parts made from S.S 316L grade material.
- Machine can run in 3mode fully automatic, semi automatic and manual.
- Only semi automatic or manual models are available in all sizes.
- S.S made basket provided for easy loading-unloading of material.
- Very easy, cost effective and safest way to sterilize your all heat & moister sensitive material.
- Pre programmable multiple cycles available.
- Aeration is carried out at the end of the cycle inside the chamber itself.
- Every cycle is operating in negative pressure so there is no chances of leakage.

## Auto Clave

### Rectangular

SR	CHAMBER DIMENSION	CAPACITY IN LTR (APR)	SIZE IN CFT.
1	450(w)x450(H)x900(D)	191 LTR	6.75 Cft.
2	600(w)x600(H)x1200(D)	450 LTR	16 Cft.
3	600(w)x600(H)x1500(D)	563 LTR	20 Cft.
4	900(w)x900(H)x1500(D)	1260 LTR	45 Cft.

### Cylindrical

SR	CHAMBER DIMENSION	SIZE IN MM	CAPACITY IN LTR (APR)
1	16"(D)x24"(L)	400x600 mm	81
2	20"(D)x36"(L)	500x900 mm	185
3	20"(D)x48"(L)	500x1200 mm	248

- Chamber and all contact parts made from S.S 316L grade material.
- PLC based automation.
- Pre programmed different cycles available for variant types of material.
- Machine can run in 3 mode fully automatic, semi automatic and manual.
- Pre program to remove air pockets before sterilization and in built drying facility after sterilization to get your material dry.
- Central locking system provided for safety during machine in operation mode.
- In build boiler provided with every model.
- Sterilization of varied hospital equipment like gloves, linen, gauze, cotton, instruments, glassware etc. using standard 121°C & 134°C which are
- pre-programmed in the memory of PLC.
